

# FEMTO12

The Hamburg Conference on Femtochemistry (FEMTO12), frontiers of ultra-fast phenomenon in chemistry, physics, and biology, will bring together scientists from all over the world to present and discuss the most recent advances in femtoscience, including reaction dynamics, coherent control, structural dynamics, solvation phenomena, liquids and interfaces, fast processes in biological systems, strong field processes, attosecond electron dynamics and aggregates, surfaces and solids with contributions from both theory and experiment.
